1. Introduction
2. Currently installed Git version?
3. Laragon - Updating Git

1. Introduction

In [Laragon](#), updating the [Git](#) service to the latest Git version is easy.

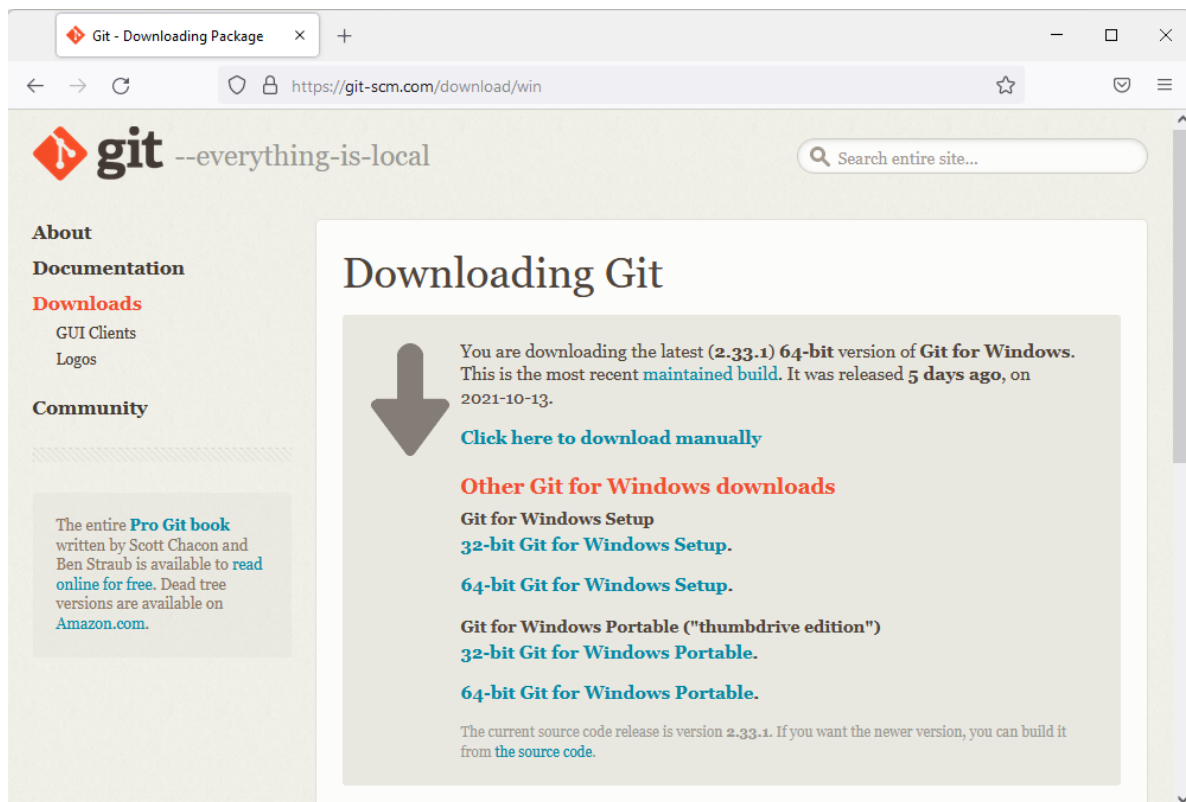

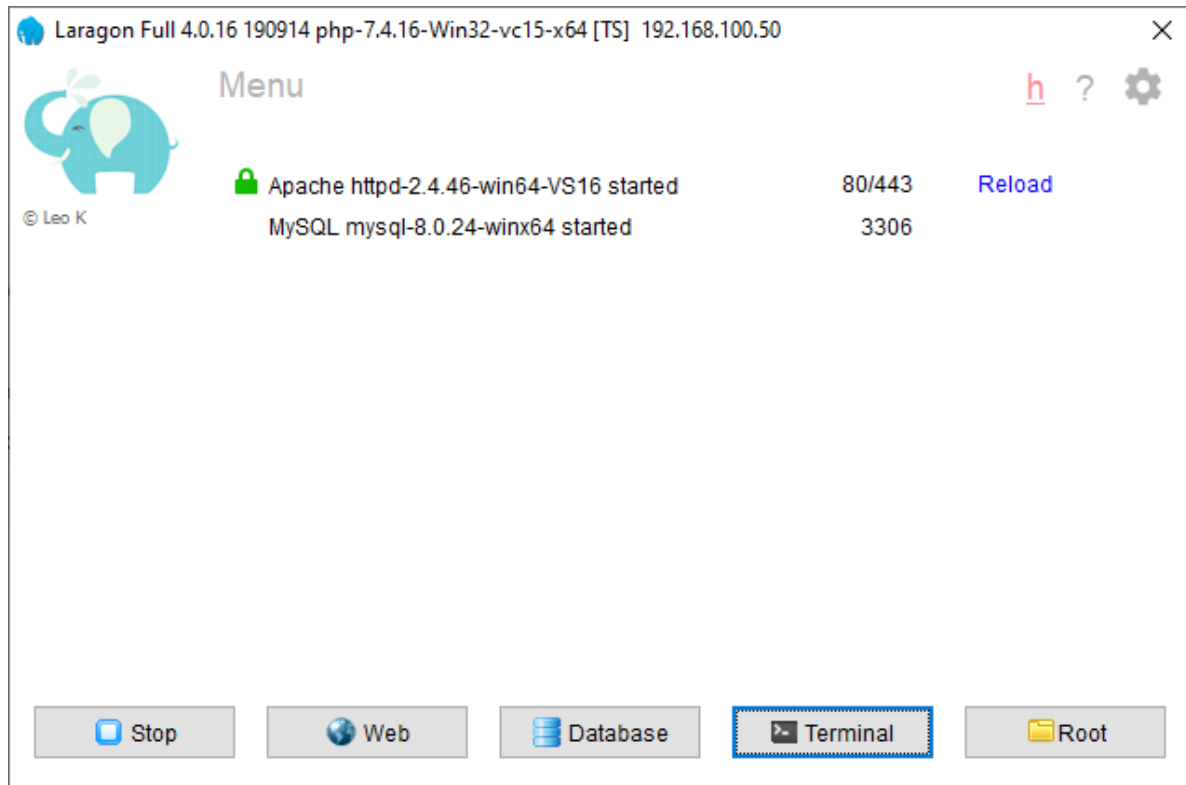

Just download the new version, unpack it into the right folder and select the new version in the Laragon menu.

2. Currently installed Git version?

- Open a terminal window by clicking the **Terminal** button in the Laragon Button Menu.
- If necessary, go to the folder `\LARAGON\bin\git\`.
- Then enter **git -version** to get the exact git version installed.

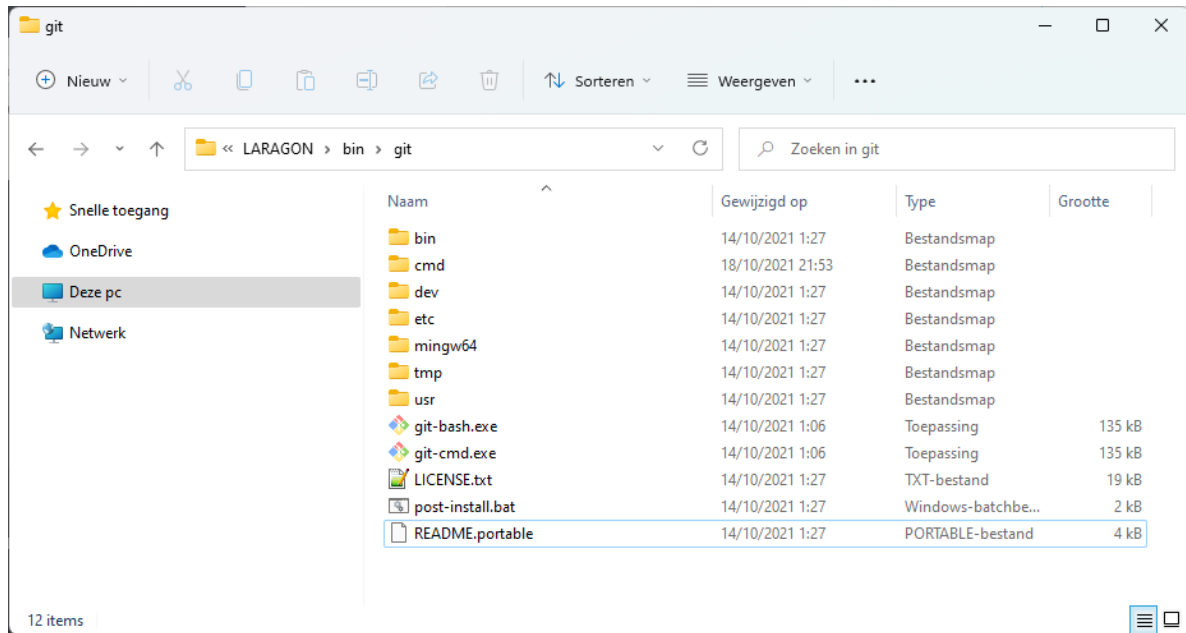

3. Laragon - Updating Git

- Download the latest **64-bit Git for Windows Portable** from <https://git-scm.com/download/win>

[scm.com/](https://sourceware.org/git/) into your \Downloads\ folder.

- The packed file is named for instance **PortableGit-2.33.1-64-bit.7z**.
- Unpack the downloaded archive in a folder with the same name, for instance **PortableGit-2.33.1-64-bit.7z**.
- Empty the \bin\git\ folder of your Laragon installation.
- Move the content of the \b**PortableGit-2.33.1-64-bit.7z**\ folder to the \bin\git\ folder of your Laragon installation.

Your Git version is now updated. Check the version in your terminal window.
